PROFILE

Recent graduate from Politecnico di Milano with expertise in building distributed systems (Java, Spring Boot, Docker, Kubernetes). Proven track record of leading geographically distributed Agile teams and delivering production-ready solutions.

TECHNICAL SKILLS

Languages: Java, C/C++, Kotlin, Python, SQL, JavaScript, HTML/CSS

Frameworks: Java Spring, Nuxt, React, Vue.js, JUnit, GTest

Developer Tools: Git, Docker, Kubernetes, Jira

EDUCATION

Politecnico di Milano

MSc in Computer Science and Engineering

Sept.2023 – Oct.2025

GPA: 29.35/30 (110L/110)

Università di Modena e Reggio Emilia

BSc in Computer Science and Engineering

Sep. 2020 – July 2023

GPA: 29.49/30 (110L/110)

INTERNATIONAL EXPERIENCES

Universitat Politècnica de València

Master's Thesis Researcher

Feb. 2025 – June 2025

Valencia, ES

University of Exeter

Visiting Student

Sep. 2022 – Feb. 2023

Exeter, UK

PROFESSIONAL EXPERIENCE

Graduate Researcher |

Politecnico di Milano - Universitat Politècnica de València

Feb. 2025 – Oct. 2025

Valencia, ES

- Developed a framework to enable behavioral reconfiguration of Java Spring microservices deployed on Kubernetes, without code redeployment.
- Implemented automatic A/B/n testing for all system configurations and selection of the best one based on custom user-defined metrics.
- Invited to present the results at SISTEDES, Spanish national conference on software engineering.

Software Engineer |

ABB - Politecnico di Milano

Sep. 2024 – Jan. 2025

Milan, IT

- Extended OPC UA publish-subscribe protocol with end-to-end security layer, implementing data encryption and certificate distribution in C++.
- Led an international team of 8 developers spread geographically across Italy and Sweden, using an agile SCRUM approach and delivering secure communication infrastructure in 5 months.

PROJECTS

MiLa - Website |

Feb. 2024 – Jul. 2024

- Developed a responsive Nuxt/Vue website for an organization combating violence against women in a 4-person team.
- Collaborated with designer to implement accessible UI and optimize mobile responsiveness.
- Integrated specialized chatbot to provide immediate psychological support.

TravelBuddy - Mobile App |

Feb. 2025 – May 2025

- Developed Android app (Kotlin, Firebase) connecting travelers with locals in 2-person startup project.
- Conducted competitive analysis and market research to position product and design monetization model.
