PROFILE

Recent graduate from Politecnico di Milano with expertise in building distributed systems (Java, Spring Boot, Docker, Kubernetes). Proven track record of leading geographically distributed Agile teams and delivering production-ready solutions.

EDUCATION

Politecnico di Milano <i>MSc in Computer Science and Engineering</i>	Sept. 2023 – Oct. 2025 <i>GPA: 29.35/30 (110L/110)</i>
Università di Modena e Reggio Emilia <i>BSc in Computer Science and Engineering</i>	Sep. 2020 – July 2023 <i>GPA: 29.49/30 (110L/110)</i>

INTERNATIONAL EXPERIENCES

Universitat Politècnica de València <i>Master's Thesis Researcher</i>	Feb. 2025 – June 2025 <i>Valencia, ES</i>
University of Exeter <i>Visiting Student</i>	Sep. 2022 – Feb. 2023 <i>Exeter, UK</i>

PROFESSIONAL EXPERIENCE

Graduate Researcher  <i>Politecnico di Milano - Universitat Politècnica de València</i> - Developed a framework to enable behavioral reconfiguration of Java Spring microservices deployed on Kubernetes, without code redeployment. - Implemented automatic A/B/n testing for all system configurations and selection of the best one based on custom user-defined metrics. - Invited to present the results at SISTEDES, Spanish national conference on software engineering.	Feb. 2025 – Oct. 2025 <i>Valencia, ES</i>
Software Engineer  <i>ABB - Politecnico di Milano</i> - Extended OPC UA publish-subscribe protocol with end-to-end security layer, implementing data encryption and certificate distribution in C++. - Led an international team of 8 developers spread geographically across Italy and Sweden, using an agile SCRUM approach and delivering secure communication infrastructure in 5 months.	Sep. 2024 – Jan. 2025 <i>Milan, IT</i>

PROJECTS

MiLa - Website  - Developed a responsive Nuxt/Vue website for an organization combating violence against women in a 4-person team. - Collaborated with designer to implement accessible UI and optimize mobile responsiveness. - Integrated specialized chatbot to provide immediate psychological support.	Feb. 2024 – Jul. 2024
TravelBuddy - Mobile App  - Developed Android app (Kotlin, Firebase) connecting travelers with locals in 2-person startup project. - Conducted competitive analysis and market research to position product and design monetization model.	Feb. 2025 – May 2025

TECHNICAL SKILLS

Languages: Java, C/C++, Kotlin, Python, SQL, JavaScript, HTML/CSS
Frameworks: Java Spring, Nuxt, React, Vue.js, JUnit, GTest
Developer Tools: Git, Docker, Kubernetes, Jira

LANGUAGES

Italian: Mother tongue • **English:** C1 • **Spanish:** B2
